DETAILED ACTION

Claims 1-25 are pending in this application. Claims 1-7 and 16-25 are withdrawn from further consideration by the Examiner, 37 C.F.R. § 1.142(b), as being drawn to a non-elected invention. The withdrawn subject matter is patentably distinct from the elected subject matter as it differs in structure and element and would require separate search considerations. In addition, a reference which anticipates one group would not render obvious the other.

Response to Restriction

Applicant's election with traverse of **Group II**, claims 8-15, drawn to compounds of **Formula II**, as defined in claim 8, and the species of **Example 48**,

3-(3H-Indol-2-ylmethylene)-5-(morpholine-4-sulfonyl)-1,3-dihydro-indol-2-one, disclosed in page 48, in paper No.8, filed on November 15, 2003 is acknowledged.

The traversal is on the ground(s) that each of the elected Group could be extended to other groups without imposing an undue burden on the Examiner. This is not found persuasive because each of the various Groups is directed to art recognized compounds which are different from each other and, are capable of supporting their own patents. Moreover, the examiner is required to conduct a commercial data base search on the class and each subclass. This would be an undue burden on the examiner.

Therefore, the restriction requirement deemed proper and is made FINAL.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicants preserve their right to file a divisional on the non-elected subject matter.

Status of the Claims

The generic concept of the elected subject matter is as follows:

Compound of formula I, of claim 1, wherein

R₁₁ - R₁₄ represent hydrogen; **R₁₅** and **R₁₆** taken together with the nitrogen atom to which they are attached form a morpholine ring; **A** is as defined; **R₁₉ - R₂₅** and **R₂₇ - R₃₁** represent hydrogen; **R₁₇** and **R₁₈** are each independently selected from the group consisting of hydrogen, optionally substituted alkyl, and optionally substituted alkoxy and **R₂₆** represents optionally substituted alkyl.

As a result of the election and the corresponding generic concept identified, the remaining subject matter of claims 8-15 are withdrawn from further consideration pursuant to 37 CFR 1.142 (b) as being drawn to non-elected inventions. The withdrawn subject matter of claims 8-15 is properly restricted as it differs materially in structure and in element from the elected subject matter supra so as to be patentably distinct there from, i.e., a reference which anticipated but the elected subject matter would not even render obvious the withdrawn subject matter and the fields of search are not co-extensive.

Objections

Claims 8-15 are objected to for containing non-elected subject matter. Claims drawn solely to the elected invention as identified supra, would appear allowable. Group VI, claims 21-25, drawn to methods of use of compounds of formula **II**, would be allowable along with the elected invention and commensurate in scope therewith.

This objection may be overcome by limiting the claims to the elected subject matter identified supra.
